

DIG3716c: Internet Interaction

Lab Assignment 1 Specifications (Site Redesign)

The assignment is due at the end of the lab session for Wed. Labs: 09/15/2010; Fri. Labs: 09/17/2010.

Overview:

- Complete a re-implementation and subtle redesign of the provided site.
- The original site contained nonstandard CSS and XHTML tables and an image of it can be viewed at:
 - o <http://www.dm.ucf.edu/~dnovatnak/dig3716c/assignment01/>
- Your redesign will be valid Transitional XHTML, contain no XHTML tables, and have content completely separate from presentation by using external CSS rules.

Specifications:

- **General Implementation**

- Code is indented to show tag parent/child relationships
- The root directory for this assignment should be:
 - ~/public_html/dig3716c/assignment01
 - Remember: ~ represents your home directory
- The Image directory for this assignment should be:
 - ~/public_html/dig3716c/assignment01/images
- Your XHTML page should be located in the root directory for this assignment and should be called page_index.html
- The <title> of page_index.html should be "First_name Last_name – Assignment 01"
- Your page should contain proper semantic formatting as discussed in lecture/lab
- All directories and filenames should contain no spaces or uppercase letters
- No links need to be functional Link

- **XHTML**

- Web page validates as XHTML Transitional (<http://validator.w3.org>)
- CSS
- The CSS directory for this assignment should be:
 - ~/public_html/dig3716c/assignment01/css
- All styles must be documented in an external CSS file called styles.css and linked to the document using the @import url rule
 - All presentational HTML attributes should be replaced with CSS rules
 - Use classes and/or id's where appropriate

- **Presentation**
 - Develop a stylesheet that will mimic the layout depicted in the provided screenshot
 - http://www.dm.ucf.edu/~dnovatnak/dig3716c/assignment01/site_original.png
 - The site should be centered in the browser window
- **Content**
 - All content required for the completion of this assignment are available at:
 - <http://www.dm.ucf.edu/~dnovatnak/dig3716c/assignment01/>
 - Use the content provided in the image_assets and site_content folders
 - You must also include an absolutely positioned <div> with id="note" that displays the message "NOTE: This site is unofficial and is an assignment for the UCF Digital Media course DIG3716c." This <div> should be colored and sized appropriately so that it is noticeable.

Grading Rubric:

Assessment:

/30	Implementation General specs followed (-5 per error)
/10	Implementation XHTML specs followed (-10 per error, -5 per warning)
/20	Implementation CSS specs followed (-5 per error)
/40	Presentation and Content specs followed

Deductions:

- 40 if all provided content is not included
- 5 per error if your site's presentation does not match provided screenshot
- 20 if <div id="note"> is not present in your site
- 40 if any XHTML tables are used

/100	TOTAL
